EXPÉRIENCE PROFESSIONNELLE

10 years of professional experience, 3+ of which are in web app development.

Since February 2024 - Vue.js/Nuxt Front-end Developer at Airddm (Permanent Contract)
I worked on various company projects for major accounts (Heineken, Michelin, Bosch).
Integration of responsive and accessible mockups. Creation of design systems and component libraries (Storybook). Code reviews. E2E testing. I participated in improving the front-end architecture and evolving the guidelines. B2B2C application development from scratch. Authentication and roles. Migration of e-commerce sites from Django to Vue.js. Creation of reusable Vue.js modules. Checkout funnels with complex client-side state management (Pinia). Dataviz with Chart.js. Front-end setup optimization. Creation of internal tools. Excellent developer culture; I share my tech watch daily.

2022-Present: Freelance Consultant
Web development for direct clients. Full project lifecycle management—from initial discovery and UI/UX design to development (React, Next.js, Vue, Svelte) and deployment. Managing client accounts, providing technical strategy, and ensuring long-term maintenance.

2025–Present: Application Development with AI Agent Orchestration.
Architecting multi-agent systems to drive end-to-end web projects: encompassing architecture, specifications, project management, sprints, coding, and reviews. Ensuring rigorous quality standards while maintaining high velocity. (Refer to website)

2024: Front-End React Developer Intern at Onaos (1 month)
Engineered React components for a medical industry application. Optimized the codebase and implemented React best practices.

2023: Montpellier Hackathon Participant
Architected a functional application within a 24-hour timeframe. Collaborated in an Agile team environment using GitHub Projects. Developed the front-end with React, TailwindCSS, and TypeScript, and implemented an Express.js and MongoDB back-end with a REST API.

2021 - 2023: React Training - OpenClassrooms (10 projects)
Completed 10 projects presented to a jury under professional conditions. Gained advanced skills in HTML, CSS, JavaScript, and Git. Developed web applications using React. Managed complex application states with Redux and RTK. Integrated various APIs and implemented data visualization and application dashboards.

2012 - 2021: Multidisciplinary background across France and Europe.
Post-production sound editor (Film Factory - Babysitting, Pioneer): coordinated between teams and managed sound databases | Permaculture training: analyzed complex systems and designed multi-factor technical specifications | Followed by 7 years in the hospitality industry across France and Europe as a bar manager, hostel manager, and head pizzaiolo. Gained experience in team management, direct customer relations, and operational management under pressure.
These experiences taught me how to communicate clearly, adapt quickly, and solve problems in real time.

DIPLÔME & FORMATION

Je me forme quotidiennement et partage sur mes réseaux. (voir mon site)

2023 : Bac+4 - Développeur d'application React, OpenClassrooms.
